Secure the things that matter

Getting children and wards ready for school, from kindergarten to tertiary level, is a tough but rewarding journey. The hardest part for many parents and guardians is waking up early every morning to help their children and wards get ready for the day. As the children grow older, mornings become easier as tweens and teens can shower, dress themselves, and even prepare a light breakfast before heading off to school.

What never changes however, regardless of the age of the children, is payment of tuition fees and associated school-related expenses. From the beginning of a child's education, up to the tertiary institution and advance level in some cases, parents are saddled with the responsibilities of catering to the imminent needs throughout the schooling years of their children and wards.

At Stanbic IBTC, we believe that every child deserves a quality and secured future with Stanbic IBTC Education Trust (SET).

SET is a plan that is convenient and flexible with long term benefits such as:

- Direct payment of fees to school - negates diversion of funds.
- Trust funds are professionally managed by leading investment managers.
- Administered by a Corporate Trustee with a strong pedigree; a brand with over 160 years of Group experience.
- The Trust can be named as a beneficiary to receive proceeds from Group Life Insurance policies.

Now is the time to make that decision!

Secure the education of your children, wards and loved ones with SET today.
